

Overview

CMT's Parent Gateway Software allows parents to view information for their students via a web browser. Parent Gateway is a web application that runs on the i5 accessing data real time from your current CIMS student software. The application will also access data from CMT's EDP-Career Pathways Software displaying information maintained by students within their portfolio (i.e. goals, volunteer work, career planning, etc). Data from your current grade book can also be uploaded and displayed for the parents to view. All data within Parent Gateway is view only.

While not all the buildings use the EDP-Career Pathways Software or a grade book (i.e. the elementary), every building within the district can utilize Parent Gateway. Through CIMS, each building will be able to identify the areas that are to be displayed to the parents.

Parents will have one user ID that will allow them access to all students enrolled in the district that are within their CIMS family record. Parents will access the system by using the first and last name of the primary contact and the family ID number for either family #1 and/or #2. Initially, parents will be presented with an email verification screen that will allow them to maintain their own e-mail address for future communications (i.e. Progress Reports e-mailed from Parent Gateway). After verifying their e-mail address, parents will then select from a list of the students that are associated with their family record for access to the individual student records.

Following is a list of areas that can be displayed:

From CIMS

Student Demographics
Current Schedule
Current Grades
Current Attendance
Attendance History
Transcript Information
Graduation Requirements
Test Scores

From EDP-Career Pathways

Educational & Personal Goals
Accomplishments
